Position: [PHP Developer/Laravel](#)

Location: [Dange Chowk, Thergaon, Pune,](#)

Employment Type: [Full Time](#)

CTC: [As per company norms.](#)

Job Description (in Brief):

We are hiring PHP Developers with **0 to 6 months of experience** who are proficient in **PHP, WordPress, Laravel, and CodeIgniter** to develop websites and web applications. The ideal candidate will participate in the complete software development lifecycle—from requirements analysis to testing—and must be comfortable working in a team or independently.

Technical Key Skills:

- Strong expertise in MVC, PHP Frameworks (Laravel, CodeIgniter)
- Proficiency in jQuery, AJAX, Bootstrap
- Knowledge in HTML5, CSS3, JavaScript, SQL Server, WordPress, MySQL
- Hands-on experience with Core PHP, APIs, AJAX
- Familiarity with tools like Jira, Trello, Basecamp, Click, Bug Herd
- Proficient with Git and RESTful APIs
- Knowledge of Linux, LAMP/WAMP, and server management
- Experience with database optimization and query performance
- Preferred: Exposure to open-source platforms like WordPress and Shopify

Desired Competencies:

- Strong understanding of OOPS concepts
- Ability to design and maintain scalable applications
- Experience in database design, normalization, and RDBMS
- Good communication (written & spoken) and logical reasoning skills
- Ability to work independently and as part of a team

Roles & Responsibilities:

- Develop and maintain web-based applications using open-source tools
- Manage Laravel app servers for performance and uptime
- Integrate third-party APIs and services
- Participate in QA processes including code reviews and testing
- Debug server and performance issues
- Handle project lifecycles independently—from design to delivery
- Maintain technical documentation and support tools
- Design scalable applications and database structures
- Ensure on-time project delivery and updates
- Suggest improvements for development tools and practices
- Collaborate with team members to solve complex problems
