Job Description

Apply Before: 30-06-2025

Position: Full Stack Developer

Location: Baner, Pune

CTC: Based on performance post-training period

Position Summary:

For candidates interested in both front-end and back-end development, the Full Stack Developer role will allow you to build complete solutions, covering UI design to server-side integration. This role requires a foundational understanding of full-stack technologies and emphasizes hands-on experience in building applications.

Key Responsibilities:

- Develop and maintain both front-end interfaces and back-end functionalities
 - Work with a variety of technologies, from HTML/CSS/JavaScript to Java and SQL
 - Contribute to UI/UX design, enhance user experience, and optimize web applications
- Collaborate on database integration, API development, and troubleshooting

Skills Developed:

- Practical knowledge of full-stack development with exposure to modern technologies and best practices
- Problem-solving in both front-end and back-end environments
